**Hewitt Boat Lift Canopies**

Constant exposure to the hot sun, driving wind, and rain can ruin your watercraft from the inside out. Cracking, fading, and peeling not only harms the look, the comfort, and the function of your boat, but also the value of your investment.

HEWITT's custom designed aluminum framed canopies are the perfect way to "top-off" the safety provided by your HEWITT lift.

Available in a variety of great colors, our nylon reinforced vinyl canopies provide years of beautiful, maintenance-free protection. They're built in many sizes and can be designed to serve other purposes as well, such as carports, boat slip covers, and rail system covers. If you have a special canopy need just give us a call.

**Hewitt All-Terrain Staircase System**

The Hewitt All-Terrain Staircase is the perfect solution for areas where a permanent staircase installation would be too difficult or costly. The system's unique design allows it to be adjusted to almost any terrain or slope. Customization is easy with several lengths of modular stair, landing and rail units available. No permanent and costly footings are required. Simply use the optional landing pads, or pound the support poles directly into the ground. The lightweight, corrosion resistant aluminum construction makes set-up and take-down a breeze.

- Lightweight aluminum construction
- Adjusts to virtually any terrain
- Steps stay level regardless of slope
- No footings required for installation
