

AC Unit

HEWITT₂

The HEWITT₂ boat lift direct drive system features convenient remote control operation and dock lighting for added safety. The unit, which comes in AC and DC versions is quick and easy to install. For use on lifts up to 6,000 lb. lifting capacity.

AC Unit

Drive unit, AC remote control box complete with eight digit keypad with security code option, two wireless remote key fobs, canopy light, motor crank for system back-up and simple mounting hardware.

DC Unit

Drive unit, DC remote control box complete with two wireless remote key fobs, 2 keys, battery maintainer* canopy light, battery box, jumper cables and all necessary mounting hardware.

**Battery Maintainer is intended only to maintain power; not charge your battery.*

DC Unit 12V or 24V

Illuminator

Photo Eye Limit Switch

15 Watt Solar Panel

BACK-UP

Simply insert the allen key into the end of the motor and turn. The drill will efficiently lower your boat with ease, without the use of any other power source. >>

Illuminator - The option to add more lighting to your dock system. This system provides an extra 110V outlet.

Limit Switch - An automatic defuse reflective limit switch, which can be positioned on your boat lift to prevent over-lifting. (Recommended on 24V motors)

Solar Panel - This 15 Watt Solar Panel will allow you to have full charging capability for your battery.
